

## What ist the MSD?

The MSD is a preventive and integrative program for students attending elementary (Grundschule) and secondary (Mittelschule) schools who are supposed to require special needs education in the areas of learning, language as well as emotional and social development.

The MSD supports teachers in their efforts to help children requiring special needs education and, doing so, contributes to improve learning conditions for these students.

The target of this program is to help students stay at their regular school.

The MSD will be consulted after all available consultation and special needs education measures have been taken by the mainstream school.

## We offer

### Diagnostics

The basis of our work is a comprehensive special needs diagnostic process for the child, e.g. by class observation or testing processes.

### Consultation

- Parents
- Teachers
- Educational staff

### Coordination between

- Teachers
- Parents
- Other expert services and physicians
- MSD with other special needs focuses (hearing, sight, autism, mental development, physical and motoric development)

### Support

### Training and education

## Fields of Work of the MSD

### Individual inclusion (Classic MSD)

Individual students with special educational needs, who attend the regular school, are taught there taken their special educational needs into account. The support provided by MSD-teachers is individually defined.

### Cooperation classes

A group of students with special educational needs and students without special educational needs are taught in one class at the mainstream school with hourly support by the MSD.

## Fields of work of the MSD

### Schools with inclusion school profile

A school with this school profile implements individual education for students with and without special educational needs on the basis of a joint education concept. General school teachers create the forms of learning together in coordination with special school teachers and other experts.

### Flexible training class

Students with increased educational needs regarding the emotional and social development in the secondary school (Mittelschule) are taken care of across the classes. Teachers, non-school expert services and the MSD cooperate closely.
